

# IF YOU PLANT IT, THEY WILL COME!

Try This Easy-to-Grow California Native: Coast Live Oak Tree

**Favorite foods:** Insects, Berries, Acorns

**Favorite garden plant:** Coast Live Oak Tree

*Quercus agrifolia*

**CALIFORNIA SCRUB-JAY**

**What do you notice about this bird?**

**What do you wonder about this bird?**

**What does it remind you of?**

Often confused with Bluebirds, Scrub-Jays are larger with a white eyebrow and gray breast. They're related to crows, and like them consume a varied diet. Beloved acorns are **cached**, or stored hidden underground to eat later, but are often forgotten and grow into Oak trees.
